LinkedIn: in/kevinsantoso-mock

TECH I USE

- **LLM Stack:** Gemini API (google-genai), OpenAI SDK, Pydantic Structured Outputs, JSON Schema, RAG, ChromaDB.
- **Engineering:** Python, FastAPI, PostgreSQL, SQLite, Git, Pytest, Streamlit.
- **Practices:** Output Evaluation, Human-in-the-Loop Triage.

ACADEMIC TRACK

Universitas Brawijaya Mandiri (Fiktif)
S1 Teknik Komputer (2023 – Sekarang)
GPA: 3.86 / 4.00 (Sem. 7)
Coursework: NLP, Software Engineering, Database Systems.

AVAILABILITY & TRACK

Target: **AI Engineer** (Primary) / Back-End Engineer (Secondary). Ready for 3-month Paid Internship (8–10 hrs/week remote). Skripsi guidance only on Friday afternoon.

DI LUAR KAMPUS

Mentor relawan kelas logika pemrograman dasar untuk siswa SMA di Malang & penulis artikel pendek teknologi di blog pribadi.

> Final-year Computer Engineering undergraduate focused on building reliable LLM workflows, schema-locked API integrations, and grounded document assistants. Passionate about shipping practical AI prototypes with clear evaluation metrics and human oversight for Sekolah Karir Batch 2.

Things I Built (Selected Works)

SyllabusMate RAG Bot — Lab AI Kampus **Nov 2025 – Feb 2026**

Built an academic syllabus Q&A prototype using Python, ChromaDB, and Gemini Flash API (repo: github.com/kevinsantoso-ai-mock/syllabusmate-rag). Created a lightweight evaluation script across 35 test queries to verify source quote faithfulness and detect hallucinated answers. Tested at internal lab scale.

SupportTicket Triage API — Internal Prototype **Mar 2026 – Agu 2026**

Designed a structured JSON extraction microservice with FastAPI and Pydantic `response_schema` that cut malformed LLM JSON outputs from 18% to under 1% and routed low-confidence tickets to human CS reviewers.

Perjalanan Karier

AI & Backend Engineering Intern — PT Solusi Awan Nusantara **Mar 2026 – Agu 2026**

Mengintegrasikan Google Gemini API dan OpenAI API ke backend Python/FastAPI untuk klasifikasi urgensi keluhan pelanggan, lengkap dengan skema validasi Pydantic dan antrean review manual bagi agen CS.

Asisten Praktikum Pemrograman Backend — Lab Teknik Komputer **[Periode belum dicantumkan]**

Membimbing 45 mahasiswa dalam implementasi RESTful API, query PostgreSQL, autentikasi JWT, serta pengujian endpoint menggunakan Pytest dan Postman.
